CARRER OBJECTIVE

Fresher Graduate Software Engineer with hands-on experience in developing web applications using Java, JavaScript, HTML, and CSS. Familiar with building secure login systems, basic admin features, and working in Linux-based environments. Interested in open-source development, comfortable with Git/GitHub collaboration, and eager to contribute to open-source communities while learning and building scalable commercial systems.

EXPERIENCE Unified Mentor | April 2025 – July 2025

- Developed and deployed responsive web modules for client projects using HTML, CSS, and JavaScript, improving UI performance and user engagement.
- Integrated Firebase services (Authentication, Firestore, Realtime Database) to enable secure logins and dynamic data updates, reducing backend latency.
- Collaborated in Agile sprints with a cross-functional team, contributing to faster delivery cycles and improving debugging efficiency by 20%.

EDUCATION

Bachelor of Engineering – Information Technology
Dr. M.G.R. Educational and Research Institute, Tamil Nadu

2025

CGPA: 7.43 / 10

TECHNICAL SKILLS

- **Languages:** Java, JavaScript
- **Frontend:** CSS, HTML
- **Database:** SQL, Firebase
- **Frame works:** React Js, Spring security, spring Boot
- **Tools:** Git, GitHub, VS Code, Postman, Maven
- **Areas of Interest:** object oriented programming ,DBMS

PROJECTS

Coffee Shop Web Application

- Developed a full-stack Coffee Shop web app using HTML, CSS, JavaScript, Node.js, Express, and MySQL with pages for Home, Menu, Cart, Login, About, and Contact.
- Implemented secure user authentication using bcrypt and built APIs for login, registration, cart operations, order placement, and order history.
- Added menu search, category filters, and interactive add-to-cart features for a smooth user experience.
- **Tools & Tech:** Node.js, Express, MySQL, bcrypt, GitHub, VS Code, HTML/CSS/JavaScript

Digital Memory House

- Developed a full-stack memory management application with secure user authentication and OTP-based password recovery.
- Implemented CRUD operations for memories, image uploads, search/filter functionality, and category-wise organization.
- Built RESTful APIs using Spring Boot and integrated MySQL database using JPA/Hibernate.
- **Technologies:** React.js, Spring Boot, Java, MySQL, Spring Security, REST APIs, GitHub.

CERTIFICATIONS

Java Full_Stack Development and training Program

-

-10000 Coders
